

January 25/27, 2005. Hall 1, Stoneleigh Park, Near Coventry, Warwickshire, UK.

Call for speakers

We are looking for individuals to present, participate as a panellist or submit topic ideas for the next IIPSEC 2005 Event (including the IP Convergence Conference)

IIPSEC (International IP in Security Exhibition and Conference) is Europe's largest security technology event combining a rich mix of the very latest digital products and solutions for use within security and building management applications.

The show delivers world-class exhibitors and visitors from all corners of the globe. With more than fifty presentations, seminars and workshops the event continues its heavy bias on knowledge, education and learning.

IIPSEC along with the IP Convergence Conference prompts debate and discussions on the new directions and technological developments within both the security and building management sectors. The shows visitors share a strong interest in the integration of network based products and solutions.

We are seeking high quality and fresh contributions on, but not limited to the following programme:

Technical Programme: 'How to' seminars for Security Professions

The recent IIPSEC 2004 event reflected the appetite for knowledge by delivering over 17 presentations to packed audiences from over 52 countries. 2005 will see an enhanced program which reflects the industries move to 'open systems'. Presented by some of the world leading experts in their field each seminar will be rich in content and visually informative

- **IP Installer Masterclass:** How to design, specify and maintain IP based security systems. The seminar is ideal for companies wishing to understand the basics around installing such systems. The pitfalls of estimating, questions to ask and what to avoid!
- **IP Video Masterclass:** How to send video images over an Ethernet network. The seminar will discuss image compression, recording, remote transmission, archiving and copying of media.
- **IP Access Control & Intruder Alarm Masterclass:** How to integrate and share access control and intruder detection data over a network. More and more Access Readers and now alarm signals are capable of running over a network. The session also looks at the most cost effective Alarm Video Verification or Live Video viewing system available over IP
- **IP Best Practice & Legal Masterclass:** How to ensure your company is prepared and ready for the future. This covers open standard protocols, convergence, data protection, approval standards plus more and more.

More information is available on-line at www.iipsec.com

January 25/27, 2005. Hall 1, Stoneleigh Park, Near Coventry, Warwickshire, UK.

Commercial Programme IP-in-Action presentations for end-users

The seminars will be delivered in a rolling program allowing visitors to come and go. Although biased towards users the seminars will also be ideal for security specialists who wish to learn from such applications.
